

Average treatment effects (ATEs)			House Vote	
Party	Treatment	Content	Choice	Percentile
Dem	Immediate Relief	Democrats will give you immediate relief from high energy costs. With everything from groceries to housing getting more expensive, the last thing families need is a bigger electric bill. States that freeze or lower electricity rates for families would receive public funding to save households \$900 in energy costs over four years and lower costs in the future. Families are struggling, and they need help with their bills today, not promises about tomorrow.	1.8%	82%
Dem	Investing In Grid - Lower Costs	Democrats have a plan to save you money on your electricity bills right now while upgrading America's electric grid to lower costs in the future. States that freeze or lower electricity rates for families would receive federal funding to build more power and modernize the grid. This would save households \$900 in energy costs over four years while building a better energy system that saves American families money for years to come.	1.7%	81%
Dem	Corporate Fairness	Democrats say you pay your electricity bill on time every month and you deserve a fair deal in return. Instead, utility companies keep raising your rates. States that freeze or lower electricity rates for families would receive public funding to build more power and modernize the grid, saving households \$900 in energy costs over four years. You hold up your end of the deal — it's time the system did too.	1.5%	68%
Dem	Taking on Utility Companies	Democrats are fighting to stop utility companies from raising your electricity bills while they make huge profits. States that freeze or lower electricity rates for families would receive public funding to build more power and modernize the grid, saving households \$900 in energy costs over four years while building a system that costs less in the long run. It's time to stop letting utility companies pad their bottom lines at your expense.	1.5%	66%
Dem	Investing in Grid - RELIABILITY	Democrats want to make sure your power actually works when you need it most. We've seen what happens when the grid fails — families left in the dark during freezing winters and extreme heat. States that freeze or lower electricity rates for families would receive public funding to build more power and modernize the grid, saving households \$900 in energy costs over four years while building a grid you can actually count on.	1.3%	60%
Dem	Wall Street Profits	Democrats want to stop Wall Street from driving up your electricity bills. Right now, utility companies raise your rates to boost profits for their shareholders and investors — not to improve your service. States that freeze or lower electricity rates would receive public funding to build more power and modernize the grid, saving households \$900 in energy costs over four years. Your electric bill should pay for better power, not bigger Wall Street payouts.	1.2%	50%
Dem	Supply/Build More Power	Democrats say that rather than blocking clean energy projects, they want to increase the supply of energy to bring down costs over time while holding utility rates constant. States that freeze or lower electricity rates for families would receive public funding to build more power and modernize the grid, saving households \$900 in energy costs over four years while building a system that costs less in the long run.	1.1%	46%

CAP Fair Share	Some Democrats are proposing that all AI companies be required to pay for the full costs of their power needs for their data centers. Under this policy, data centers that are built would not raise electricity prices for Americans.	69.7%	99%	97%	82%	42%	65%	100%	100%	99%	94%
Clean Fair Share	Some Democrats are proposing that all AI companies be required to use clean energy and pay the full costs of the power needs for their data centers. Under this policy, data centers that are built would not cause pollution or raise fuel or electricity prices for Americans.	58.4%	76%	94%	66%	24%	63%	87%	79%	71%	87%
Bernie Moratorium	Some Democrats are proposing a mandatory pause on building new AI data centers. Under this policy, no new AI data centers would be built until their impacts on electricity prices, the environment, jobs, and society can be addressed.	58.2%	75%	95%	66%	22%	52%	94%	79%	66%	21%
Trump Voluntary Agreement	Some Republicans are proposing that AI companies voluntarily build power stations to supply all of their power needs for their data centers. Under this policy, AI companies that comply would build data centers without raising electricity prices for Americans.	55.9%	70%	17%	64%	93%	47%	65%	75%	83%	24%
